It got me hooked on iris folding and I used this book to teach my grandchildren, 8 and 11, how to iris fold. The 8-yr old loves it so I gave her my book. I ordered another one because I have friends who want to learn how to do this. It is great for the beginner to learn the process. If you are experienced, the designs might be a little too simple, but I have also learned that this method is not the only way to do this. 0 of 0 people found the following review helpful. Five Stars By lonsomdovFun0 of 0 people found the following review helpful. Buy only one By QuetMany of Maruscha Gaasenbeek's books contain the same designs. Pick one and you're probably okay. The instructions were clear and easily followed.

Tine and Maruscha get creative with colours and paper. Matching and less obvious colour combinations are demonstrated in this book. The new Iris folding patterns are perfect for the more daring colour combinations!
