Eric Braun : Lookin' for Light: Science Adventures with Manny the Origami Moth (Origami Science Adventures) before purchasing it in order to gage whether or not it would be worth my time, and all praised Lookin' for Light: Science Adventures with Manny the Origami Moth (Origami Science Adventures):

Manny the origami moth has never been outdoors. When he flies out a window, he discovers a bright and fascinating world. Luckily Brynn the bee is there to teach him all about sunlight, rays, shadows, and more. Flutter about with

Manny, and learn all about light.

Filled with colorful full-bleed illustrations, the titles in the Origami Science Adventures series playfully demonstrate basic science concepts and vocabulary with the help of an origami creature. Lookin for Light stars Manny, a paper moth, who learns about light, shadows, reflection, and color. Each entry includes highlighted key terms, which are defined both in the text and in a glossary, and simple directions to make the featured origami friend. Though no one concept is explained in any real depth, each book lays out enough information for students (who may need help with terms like cochlea) to pique their curiosity and offer a general idea of how the world works. Grades 1-3. --Sarah Hunter

About the Author Eric Braun has written more than one hundred books for kids and teens, including many about sports. He coaches youth baseball and soccer, has two sports-loving sons, and has suffered many disappointments as a lifelong fan of the Minnesota Twins. A "Sunshine State" native, Jamey Christoph studied illustration at the Ringling School of Art and Design in Sarasota, Florida. His stylish illustrations appear regularly in major newspapers and magazines and have received multiple recognitions from the Society of Illustrators and Communication Arts.
