I bought this because of the 5 star reviews, but this book deserves zero star. 25 thin pages, back to back, on a very thin paper no less! You can see the lines and if you try to color this, with what-ever, (I tried color pencil and a very thin line marker) you'll be able to see that on the other page, therefor making the second page useless. For 8 whole American dollars. This is supposed

to be made in America? Like, in what year? 1810? Seriously. I don't know why anyone would rate this any higher than 1. As you can see in the picture, it is one kind of face, just photocopied 24 times. Generic, heavy lidded, thin nosed, Anglo-Saxon looking face. No other ethnicity is even hinted at. This is ridiculous. I'm so glad to be a prime member and hopefully I'll get my money back soon. For the quality and creativity of this so called "book", I might have paid 25 cents, definitely not 8 dollars. What a rip off. 4 of 4 people found the following review helpful. What am I supposed to put here? By Ashley Flynn As a single mother of 8, I found it difficult to keep up with the latest trends. I didn't have time to get my eyebrows "on fleek" whatever that means. Stumbling across this book in the wee hours of the morning because my youngest kept showing me Vines, I knew I had found something special. I was intimidated at first, being that I can't even draw a stick figure of myself, but I took a chance and bought it. Holy moly! If only I had found this gem sooner then maybe my husband wouldn't have left me for that kpop star, Jimin. Anyways, the book is so superb. I can try out all the latest looks without worrying about poking myself in the eye first. After working my way through the book I've discovered.. I actually don't like makeup. I like art. I'm an artist now. Which isn't great news for my kids but I must pursue my dreams. Casseroles wont make themselves.. am I right ladies? Highly recommend! 2 of 2 people found the following review helpful. Five Stars By Customer this is awesome! you go kelly-o
