Christopher Natale : Perspective Drawing for Interior Space before purchasing it in order to gauge whether or not it would be worth my time, and all praised Perspective Drawing for Interior Space:

Using step-by-step instructions together with line-colored drawings, Perspective Drawing for Interior Space offers procedural instruction that covers freehand and technical one-, two-, and three-point perspectives. This text begins with the basic fundamentals of perspective by utilizing geometric shapes (cubes, cones, pyramids) and then advances beyond the core skills, to creating furniture, and finally, complete interior spaces. Students will learn to use grids to help them draw scale and proportion in perspective. The text also teaches students to use floor plans and elevations to create these drawings.

About the Author Christopher Natale is an associate professor in the Interior Design department at The Art Institute of Phoenix, a CIDA-accredited program. Natale's product design experience includes both computer-aided design and traditional illustration methods. His original designs and custom pieces have earned numerous awards and gained wide recognition among prestigious galleries, private clients, and interior design firms.
