Caroline Birkett : The Gift Wrapping Book before purchasing it in order to gage whether or not it would be worth my time, and all praised The Gift Wrapping Book:

0 of 0 people found the following review helpful. Did not deliver the content promised. By Robert G. Thomas The service from the bookseller was fine. Unfortunately the content description was far more than the book delivered. There were no new ideas and the ideas presented were trivial. Certainly not worth the price. The bookseller made a point of saying that she was not responsible for content just the service of providing the book. 25 of 27 people found the following review helpful. Too primitive. By Jelena V.P. I was quite disappointed with this book. Included patterns and templates were, well, great if you are in a 5th grade. Some designs were simply tasteless (wrapping a gift in a bubble-wrap - oh please!). I was also expecting to see more techniques for making bows and gift accessories, but there were mostly instructions on how to make boxes and some hideous fabric bags. And does anyone really need 10 introductory pages and 2 pages about the types of ribbons in a 100-page book? Don't expect to impress anyone except

your Mom and Grandma, who will like almost anything you do anyway. 11 of 11 people found the following review helpful. I'm actually looking forward to next Christmas! By Amanda Richards This book has some of the best gift wrapping tips and ideas I've ever seen. This Christmas, I was getting bored wrapping gifts the same old way, so I began surfing for some ideas to spice it up a little. This book did not disappoint. It has ideas for all skill levels, and uses materials that are widely available. It also has great wrapping ideas for gifts with unusual shapes and sizes. It comes complete with simple instructions, step by step photographs and diagrams, and even has all the templates you need to get started. From now on, all gifts will be spectacular, inside and out.

The book is full of ideas and inspirational photographs that will fire anyone's imagination. Whether its exploring the possibilities of recycling newsprint, corrugated paper, or string, or inspiring the reader to find new and exciting combinations of shop-bought papers and ribbons, Caroline Birkett has suggestions galore. One whole chapter gives detailed instructions for making individual boxes and bags to accommodate awkward shapes; another is devoted to providing solutions for really tricky wrapping problems; yet a third is filled with advice and suggestions for finishing touches, from tags to tassels and paper flowers. Step-by-step photography ensures every project is easy to follow, with mouthwatering pictures of the finished wrapping.
