From Biteback Publishing : The Margaret Thatcher Colouring Book before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Margaret Thatcher Colouring Book:

At long last, by popular demand, the colouring book market comes of age with this glorious tribute to Margaret Thatcher. Featuring a cast including Ronald Reagan, Winston Churchill, and General Augusto Pinochet, this brief, beautiful, and completely inaccurate illustrated biography of Britain's first female Prime Minister promises hours of creative gratification. By turns inspirational and hilarious, this is the essential buy for anyone obsessed by politics

seeking hours of creative and relaxing fun. Nathan Brenville is an animator and illustrator based in London, where he is currently studying for an MA in Animation at Central Saint Martins.
